I am a Trainee JavaScript Developer looking for a full-time position in a company in Poland or Ukraine. My goal as a developer is to improve my knowledge and programming skills. I learned HTML5, CSS3 and JavaScript. I continue my studies and in the near future I will study React, Redux, NodeJS, MongoDB on the course. After studying, I want to work as a Full Stack Developer. I will learn, develop and work to become a good specialist in your company.

## PROJECTS EXPERIENCE

### ICE-CREAM [HTML5, CSS, SASS, JavaScript, Parcel, GitHub]

<https://oxica.github.io/special-team>

A team-project related to the creation of a landing page for the practice of learned technologies in teamwork. On the project, I performed the tasks of a team lead. My main responsibilities included developing the basic structure of the project, helping other developers in our team, and presenting the project.

### FAST FOOD WEBSITE [HTML5, CSS, JavaScript, GitHub]

<https://oxica.github.io/fast-food-website>

The project was created as part of an additional practice to consolidate skills HTML5, CSS, JavaScript.

### WEB-STUDIO [HTML5, CSS, SASS, GitHub]

<https://oxica.github.io/-goit-markup-hw-08>

A responsive web-page layout, which applies all best practices taken from BEM methodology.
